

Symposium on

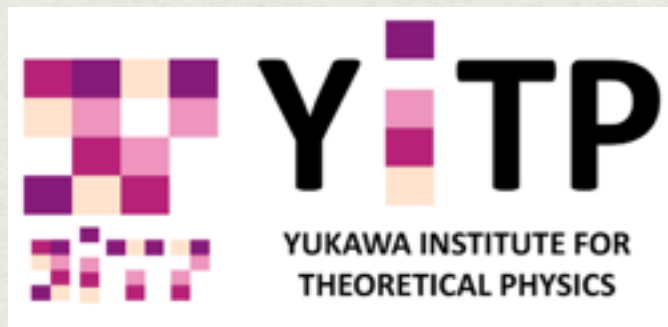

“Hadrons and Hadron Interactions in **QCD** 2015”

-- *Effective Theories and Lattice* --

March 2-6, 2015

Long term workshop, February 15 - March 21, 2015

On behalf of LOC, I would like to thank not only all **speakers**, who gave very nice talks, but also all **participants**, who made very stimulating discussions possible, during the symposium.

I also would like to thank students, who helped the LOC during the symposium: **Yuki Kamiya, Yuta Kikuchi, Hidekazu, Tukiji, Takahiro Doi, Kenta Miyahara, Yuta Yoshida, Kento Watanabe.**

Finally I am most grateful to our secretaries at YITP,

Asako Ando and **Kuniko Tsuruhara,**

for their hard works, without which we could not organize this symposium.

I hope that all of you have enjoyed both the symposium and your stays in Kyoto.

Enjoy your remaining time in Kyoto and have a nice trip back home.

See you in Kyoto again, probably in

HHIQCD 201X (X=7,8?)
