## Simple interpretation:

$I=0$ pair

$I \neq 0$ pair

The spatial overlap is the largest for the $I=0$ pair.

## "Pairing Correlation"

(note) The $I=2 j$ pair is unfavoured due to the Pauli principle.
(note)
$\psi\left(l^{2} ; L=0\right)=\sum_{\mu}\langle l \mu l-\mu \mid L=0,0\rangle Y_{l \mu}\left(\widehat{\boldsymbol{r}}_{1}\right) Y_{l-\mu}\left(\widehat{\boldsymbol{r}}_{2}\right)=Y_{l 0}\left(\theta_{12}\right) / \sqrt{4 \pi}$
