• 物質場とその相互作用　• 統一対称性とその破れ　• 重力、宇宙項　• etc.

運動方程式：

$$\text{dilatino}\quad 0 = \not{D}(\omega)\lambda - \frac{1}{12}H_{MNP}\Gamma^{MNP}\lambda = \not{D}(\omega - \tfrac{1}{3}H)\lambda$$

$$\text{gaugino}\quad 0 = \not{D}(\omega, A)\chi - \frac{1}{12}H_{MNP}\Gamma^{MNP}\chi = \not{D}(\omega - \tfrac{1}{3}H, A)\chi$$

\# of massless modes on $\mathcal{M}^{3,1}\times\mathcal{K}^6$, $\Delta_{10}\,\mathcal{F}(x,y)=0$ → \# of massless modes on $\mathcal{M}^{3,1}$, $\Delta_4\,\Phi(x)=0$ ↔ \# of zero modes on $\mathcal{K}^6$, $\Delta_6\,\Psi(y)=0$

3種のスピン接続：$\widehat{\omega} \equiv \omega - \frac{1}{3}H,\ \omega_\pm \equiv \omega \pm H$ の関係は？
ゼロモードの数、指数は変わるのか？
4次元有効理論に登場する世代数は変わるのか？
