PROCEEDINGS OF PLUTONIUM IN THE ENVIRONMENT

Editors

Akira Kudo  Dallas C. Santry

Pergamon
CONTENTS

November 1995

v Foreword: Proceedings of Plutonium in the Environment, 6–8 July 1994, Ottawa, Canada

Case Studies

1089 Plutonium mass balance released from the Nagasaki A-bomb and the applicability for future environmental research

1099 Characteristics of plutonium and americium contamination at the former U.K. atomic weapons test ranges at Maralinga and Emu

1109 Distribution of $^{236}$Pu and $^{239}$Pu concentrations in sediments from the Ob and Yenisey Rivers and the Kara Sea

1121 Plutonium from European reprocessing operations—its behaviour in the marine environment

Analysis and Measurements

1135 Nuclide analysis on low-statistics alpha-particle spectra: an experimental verification for Pu isotopes

1145 Metrology of plutonium for environmental measurements

1151 Determination of plutonium content and isotopic ratios in environmental samples by L x-ray and a-particle measurements

1159 Studies of the speciation of plutonium and other actinides in natural groundwater using anion exchange resin

1175 Recent observations on the physico-chemical speciation of plutonium in the Irish Sea and the western Mediterranean

Geosphere and Atmosphere

1191 Plutonium released by the Nagasaki A-bomb: mobility in the environment

1203 Plutonium from Chernobyl in Poland

Hydrosphere

1213 Observations on plutonium in the oceans

1225 Plutonium in the Baltic Sea

(continued on inside back cover)
