

We badly need for facts, to
Under these circumstances,
single paper

Research Institute for Fundamental Physics
Kyoto University

(2)

As for the third group, there is only one report related the ~~and~~ structure of the nucleus, ^{electromagnetic}
It is certainly unnecessary to emphasize the importance of this ~~work~~ for the future development of fundamental physics. We really do not know what is really meant by the "structure" of a particle. For the time being, we have to grope in the dark. For this very reason, it is all the more gratifying that so many big accelerators are going to be built in near future in so many countries. The last group of papers submission ~~are devoted to~~ is related to it
As ~~although~~ the time allotted to all these ^{each} ~~important~~ subjects is too short to go into depth or into details, ~~if we can use the time great~~ ~~ask all of you shall be able to make use of~~ the time as ~~effective~~ efficient use of the time as possible.

I ask all of you to make an efficient use of the time as possible. Now the first speaker is

Here the shade of ignorance deepens.
