Dear Professor Wheeler:

This is just to express my deep gratitude for your kind effort in relation to the International Conference to be held in Japan. I and, I am sure, my colleagues in Japan realize that how effective were your thoughtful letters to UNESCO and the Union in bringing the matter to the happy settlement.

I intended to see you on the occasion of Washington Meeting, but, as I am not sure whether I shall be able to attend the meeting, I write this letter to tell you how happy are Japanese physicists including myself.

Yours sincerely,
Hideki Yukawa
