Dear Professor Toyoda:

Japan is an important mainstay of Pugwash. Its contributions and continued participation are very valuable. Now Pugwash is faced with a problem of survival. Increased activities, the pressures of inflation make its survival imperiled.

Without your financial assistance, we face serious problems. We need your help. In the past we have survived somehow without adequate support from you. In 1977 this may not be possible. Your assessment for 1977 is \$3,840.

Although your Group has not been able to meet its obligation in the past, we look to Japan with great hope that you will find a way to solve our current dilemma.

Sincerely,

William M. Swartz
