Prof. Yoshio Fujioka, Secretary
International Conference on Theoretical Physics
Ueno Park
Tokyo, Japan

Dear Prof. Fujioka:

Thank you for your letter of December 11, 1952. I have not heard yet about my travel funds, but if I should be able to participate, I would like to give a lecture in session (c ii) with the tentative title: Magnetic Relaxation in Solids.

I also hope to attend the conference at Nikko and might be able to make a communication on recent work done by several colleagues on the radiowave study of the hydrogen molecule, if this is desired.

Very sincerely yours,

/s/

N. Bloembergen
Associate Professor
of Applied Physics
