

GEORGE HOLT PHYSICS LABORATORY.

TELEPHONE No. 5460 ROYAL.

FROM
PROFESSOR J. CHADWICK.

THE UNIVERSITY OF LIVERPOOL.

28 April 1938.

Dear Mr. Yukawa.

I should be very grateful if you could send me copies of your papers on the interaction of elementary particles.

I should like to take this opportunity, if I may, of congratulating you on a most interesting and beautiful investigation.

As you may know Mr. E. J. Williams obtained some evidence for your new particle as long ago as last June but it was not absolutely convincing. Some weeks ago he got another photograph which, to me at any rate, settles the matter. I have

asked Mr. Williams to send you pictures
of his tracks so that you may see
how convincing they are. The reproduction
in Nature was not very good.

Yours sincerely

J. Chadwick.

Please give my best regards to Professor
Nishina.
