Dear Dr. Yukawa:

I was perfectly delighted to get your kind
congratulations and the picture.

As you say, the Nobel Prize certainly came at
a most beneficial time as it should certainly assist us
in our efforts to obtain funds to build a great cyclotron
that will bring us up into the range of mesotron forces!

It was a great pleasure seeing you here, and
I do hope that our paths will cross again before too
long.

With all good wishes,

Very cordially,

Ernest Lawrence
