Dear Dr Bonetti,

I am very sorry that I was late in answering to your letter. I had changed my post from Osaka to Kyoto, so that I received your letter only very recently.

I accept your proposal with great pleasure and wish to send you a summary report on the problem of the meson as soon as possible. I ask you, however, a delay of sending the manuscript to the end of February, since I am very busy now. I am always,

Yours very sincerely,

Hideki Yukawa.
