

47-3

Physics Department,
University of Kyoto,
Kyoto, Japan,
July 22, 1947.

Dear Mr. Neufeld,

It is a delight for me to find you engaging^{ly} in the same subject of theoretical physics as ours. I send by separate post issues of a new journal of theoretical physics, which I have been editing from July last. I am sorry that I cannot send reprints of earlier papers by us, as they were exhausted. I am always wanting to exchange scientific informations between your country and ours. I shall be very much obliged, if you may be able to help us in this matter.

Yours very truly,

H. Yukawa
