Mr. H. Yukawa
Department of Physics
Kyoto Imperial University
Kyoto, Japan

Dear Yukawa:

I am sending you the articles which we have published since 1941. I might add that we have tried to check in the United States the results contained in these papers during the summer just ended, and got some large fluctuations, perhaps due to exceptional solar activity that ~~these~~ masked the systematic change with latitude which we and everybody else had found before.

Cordially yours,

RAM:IH

Robert A. Millikan
