Prof. Alfred Landé
MINERALS LABORATORY OF PHYSICS

June 13, 1948

Dear Prof. Yukawa:

You were so kind as to send me the "Progress of Theoretical Physics", and I want to thank you most cordially for having the opportunity to study this most interesting journal which contained several articles of profound interest to me and my coworkers. I am delighted in particular to see how very fast, after the unfortunate struggle of the last years, fundamental research in Japan has resumed its leadership again. It seems most appropriate that the problem of particle versus field is attacked by you, Taketani, Sakata, Tomonago and others from such a high philosophical point of view which alone promises to lead to new insight of a fundamental kind.

Would it be possible for me to obtain Nr. 1 of Vol. 1 so as to make my set complete?

Yours very sincerely

A. Landé
Alfred Landé.
