Hideki Yukawa
Physics Department
Kyoto University
Kyoto, Japan,
July 8, 1948.

Dear Prof. Landé:

I received your letter with great pleasure. I send you a copy of Nr. 1, Vol. 1 of Prog. Theor. Phys. by separate post, as very few copies are remaining. I would be very much obliged, if you would kindly send me reprints of papers by yourself and your coworkers.

I have been attempting at the extension of field concept with the expectation that the idea of "reciprocity" proposed by Born in 1938 would be useful as guiding principle. In this connection, I arrived at a result as shown in the enclosed note, which was a copy of the letter to appear in Prog. Theor. Phys. soon.

I hope that I shall probably have the opportunity to see you this autumn, as I accepted the invitation from Prof. Oppenheimer as visiting professor of the Institute for advanced study in Princeton.

Yours very sincerely

Hideki Yukawa
